	Anti-Syphilis Test	ID-S11	Whole Blood	Strip	1T/20T	FSC
		ID-S12	Serum/Plasma	Strip	25T/50T/100T	
		ID-S21	Whole Blood	Cassette	1T/20T	
		ID-S22	Serum/Plasma	Cassette	25T/50T/100T	

Drugs of Abuse Test	Product Name	Catalog No.	Specimen	Format	Test/Kit	Regulatory Status
	Cocaine(COC) Test	COC-D11	Urine	Strip, Panel, Cassette	1T/20T/25T/40T/50T/100T	
	Amphetamine(AMP) Test	AMP-D11				
	Methamphetamine(MET) Test	MET-D11				
	Marijuanan Test(THC) Test	THC-D11				
	Opiates(OPI) Test	OPI-D11				
	Morphine(MOP) Test	MOP-D11				
	Methylenedioxy methamphetamine(MDMA) Test	MDMA-D11				
	Methadone(MTD) Test	MTD-D11				
	Tricyclic Antidepressants(TCA) Test	TCA-D11				
	Benzodiazepines(BZO) Test	BZO-D11				
	Barbiturates(BAR) Test	BAR-D11				
	Oxycodone(OXY) Test	OXY-D11				
	Multi-Drugs 2-6 combo test	MD-D26				
	Multi-Drugs 2-12 combo test	MD-D22				
	Multi-Drugs 4-18 combo test	MD-D45				
	Multi-Drugs 4-16 Cup with adulteration strip/falsification control OXI/NIT/S.G./GLUT/PH/CRE	MD-D46				
	Drug Saliva Test COC/AMP/MET/THC/OPI/MOP	DS-D11S	Saliva	Cassette	1T/20T/25T/40T/50T	
Multi-Drugs Saliva 2 -6 Test	DS-D21S					

HCG Pregnancy Test

The Human Chorionic Gonadotropin (hCG) Pregnancy Test Kit is a rapid, one-step lateral flow immunoassay for the qualitative determination of hCG in human urine specimens, to aid in the early detection of pregnancy.

LH Ovulation Test

The Luteinizing Hormone (LH) Ovulation Test Kit is a rapid, visual, and one-step test for the qualitative determination of LH surge in human urine specimens, to help predict ovulation time, signaling that ovulation is likely to occur in the next 24-48 hours, so as to guide reproductive women to choose the optimal conception time or safe period contraception.

FSH Test

The Follicle Stimulating Hormone (FSH) Test Kit is a rapid qualitative test for detect FSH in urine. This help to check the function of the pituitary gland and check if hormone levels are normal. The test can be used to see if a women has started the menopause. The test may also be used (along with other tests) for detecting possible causes of both male and female infertility.

- Self-detection of ovarian function
- Guide to prevention of premature ovarian
- Diagnosis of menopause

Bacterial Vaginosis Test

Bacterial Vaginosis Combo Test Kit (dry chemical enzymatic detection), is an in vitro diagnostic reagents products to test female bacterial vaginosis. Through testing the H_2O_2 , PH value, SNa and LE, the four indicators of female vaginal discharge, evaluate comprehensively, and get the result, it has certain guiding significance for the clinical diagnosis.

BV SNa Test

Bacterial Vaginosis Quick Test Kit is designed as a simple, rapid, cost effective method for in vitro testing. It is qualitative test for the determination of neuraminidase (SNa) in female vaginal fluid, which is auxiliary diagnosis of bacterial vaginosis.

(AFP) Alpha-Fetoprotein ELISA Test

AFP ELISA Test is designed for the quantitative determination of AFP in serum specimens to aid the diagnosis of Primary Hepatocellular Carcinoma or fetal open neural tube defects.

Neutrophil Gelatinase-Associated Lipocalin Rapid Test Kit (Colloidal Gold)

NGAL Rapid Test Kit applies colloidal gold Immunochromatography, for the qualitative detection of Neutrophils Gelatinase Associated Lipocalin (NGAL) in urine. The test is used as an aid in the early diagnosis of acute kidney injury, risk classification and treatment monitoring.

- The optimal biomarker for early diagnosis of acute kidney injury (AKI).
- Detection of AKI and prognosis evaluation diagnosis of AKI.

(DOA) Drug of Abuse Test

Drug of Abuse Test is a qualitative immunoassay for detection of specific drugs present in human urine or saliva at the cutoff concentration of the drug specified. The drug test kit is available in strip, panel, cassette and cup format.

Microalbuminuria (MAU) Rapid Test Kit (Colloidal Gold)

This kit is a rapid visual immuno-assay for the qualitative, presumptive detection of albumin in urine for selftesting. The test used as an supplementary method in the diagnosis of diabetic nephropathy and other renal damage. MAU occurs when the kidney leaks small amounts of albumin into the urine.

- The first indicator of a renal dysfunction, especially for diabetic patients.
- Independent risk indicator to evaluate the progression of chronic kidney disease (CKD).

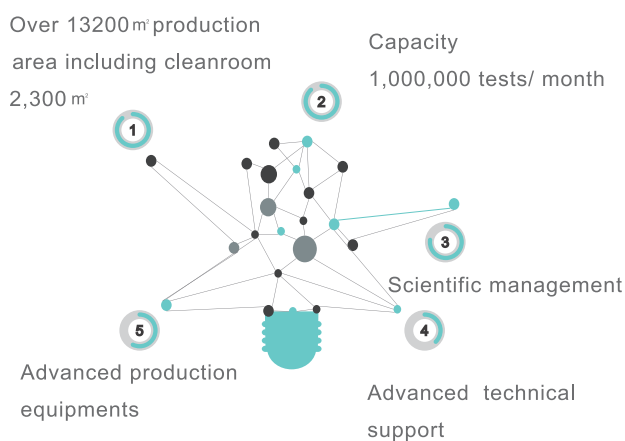

Why Choose Us?

Quality Control Advantage

Production Advantage

R & D Advantage

1
23 R & D staff scientists
20 staff in RA Dept.

2
Over 10% of
turnover invested
in R & D center

3
Invited a number of well-known
university experts, such as
professors of Zhejiang University
to be our technical consultants.

4
Developed a joint research
center with Zhejiang University
of Science and Technology

About Singclean

Hangzhou Singclean Medical Products Co., Ltd., established in 2003 with registered capital of RMB 80 million Yuan, is a national high and new technology enterprise. Singclean Medical manufacturing site covers the construction area of 17,000 m², including producing tract 13,200 m², class C cleanroom 2,300 m², class B cleanroom 300 m², class A cleanroom 60 m².

Our main products include Cross-linked Sodium Hyaluronate GEL, Medical Sodium Hyaluronate Products, High-tech Hemostatic Products, and In-vitro Diagnostic Reagents Products.

Singclean has fully established and strictly operated the quality management system for In-vitro Diagnostic Reagents Products, to ensure the company has the capability to consistently provide customer with products/services which meet the requirements of customer and regulatory, and is committed to continual improvement of the system so as to improve customer satisfaction.
